

"Essentials for Healthy Homes Practitioners" Course

If you visit homes to provide health or inspection services of any type, you will benefit from the Essentials for Healthy Homes Practitioners Course. The training will help you understand the connection between health and housing and how to take a holistic approach to identify and resolve problems, which threaten the health and well-being of residents.

January 15 & 16, 2019

8:30am-4:30pm

Location:

UMass Lowell Health and
Social Science Building
Lowell, MA 01854

The training complements hazard-specific training in lead-based paint, radon, mold, pests, and asbestos. It identifies root causes of health problems in a home and links them to seven principles of healthy housing: Keep it dry; Keep it clean; Keep it pest-free; Keep it ventilated; Keep it safe; Keep it contaminant-free; and maintain the house. Course participants will have a better understanding of how to collaborate to make healthy homes a reality in their community. To learn more, please visit the National Healthy Homes Training Center and Network website: <http://healthyhousingsolutions.com/hhtc/>

Participants will learn how to:

- Identify key health issues related to housing.
- Reduce moisture, dust allergens, and contaminant sources within the home.
- Prevent common household injuries.
- Stay current with the latest research on healthy housing issues.

This course has been approved for **Continuing Education Credit** hours. To view the learning objectives go to:
